

Download putty from here: <http://www.putty.org/>

Find the ip address of the Enigma device.

Open putty:

when in the Putty program fill in “Host name” with the IP address, under the section select “Telnet” and press open.

Author: Rapid IPTV Support Team

Website: <https://rapidiptv.biz>

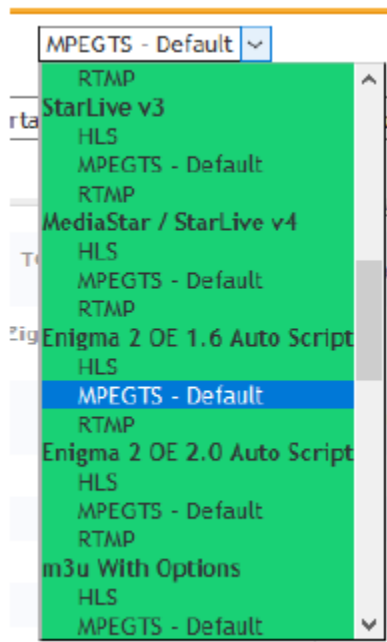

When the black screen open, type in "root" and press enter.

```
openpli 4 hd1100  
  
hd1100 login: root
```

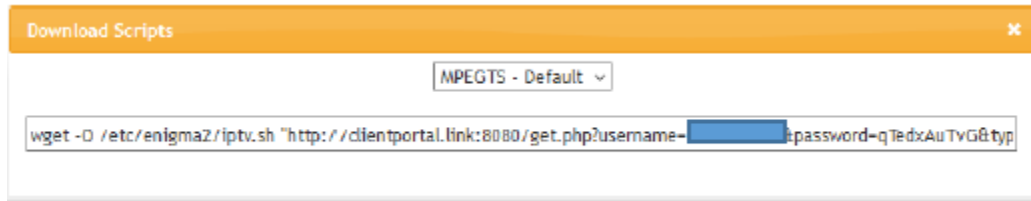

and after that you're password: in mine case Dreambox (password doesn't show) and press enter

```
openpli 4 hd1100  
  
hd1100 login: root  
Password:
```

Go To reseller Portal and to the added line press the green arrow, choose Enigma 2 oe 1.6 or 2.0

Copy everything:

it should look something like this:

`" Wget -O /etc/enigma2/iptv.sh"
http://tv.stableiptv.tvip.xyz/get.php?username=test&password=test&type=enigma22_script&output=mpegts" && && Chmod 777 /etc/enigma2/iptv.sh /etc/enigma2/iptv.sh "`

paste this in the black screen and press enter:

```
openpli 4 hd1100

hd1100 login: root
Password:
root@hd1100:~# Wget -O /etc/enigma2/iptv.sh"http://iptv-tutorial.net:8000/get.php?username=sclup653&password=1911&type=enigma22_script&output=mpegts" && && Chmod 777 /etc/enigma2/iptv.sh /etc/enigma2/iptv.sh
```

After that **type reboot** and press enter

```
hd1100 login: root
Password:
root@hd1100:~# Wget -O /etc/enigma2/iptv.sh"http://iptv-tutorial.net:8000/get.php?username=sclup653&password=1911&type=enigma22_script&output=mpegts" && && Chmod 777 /etc/enigma2/iptv.sh /etc/enigma2/iptv.sh
sh: syntax error: unexpected "&"
root@hd1100:~# reboot
```

At these time you're box will restart and you can watch you're channels.
